SKILLS

- Python
- Data Analytics
- SQL
- Data Cleansing
- EDA
- Data Processing
- Data Visualization
- Deep Learning
- Machine Learning
- Pytorch
- CNN
- Neural Networks
- Big Data
- Pyspark
- Pandas
- Numpy
- Scikit-Learn
- Matplotlib
- Jupyter Notebook
- Github
- GIT
- Data Pipeline
- Random Forest
- Feature Engineering

LANGUAGES KNOWN

- English
- Hindi
- Marathi

CERTIFICATIONS

- Simplilearn Data Scientist Master's Program

ACHIEVEMENTS

- Event Management Cell Lead, DSSA , CMC Member, DSSA, Core Member of Students Association in B.Tech / B.E.

RESUME SUMMARY

Quick learner, Data Science graduate with hands-on experience in Machine Learning, Recommendation Systems, Predictive Analytics, and Big Data technologies. Skilled in Python, PySpark, Scikit-learn, and PyTorch with practical project experience in developing intelligent systems and analytics-driven applications. Strong interest in AI, data-driven problem solving, and scalable data solutions

EDUCATION

Post-Graduation

Course	Post Graduate Diploma In Big Data Analytics (PG-DBDA)
College	Centre for Development of Advanced Computing (CDAD) Bangalore
Year of Passing	Feb 2026

Graduation

Course	B.Tech / B.E. (Data Science)
College	DY Patil College of Engineering and Technology, Kolhapur
Year of Passing	2025
Score	6.0 cgpa

Class XII

Board Name	Maharashtra
Year of Passing	2021
Percentage	85.17%

Class X

Board Name	Maharashtra
Year of Passing	2019
Percentage	72%

INTERNSHIPS

Indian Institute of Technology Bombay (IITB), June 2024 - September 2024

- Applied BERT and machine learning techniques to solve complex problems in the ed-tech sector, improving model accuracy using metrics like Precision, True Positive, and F1-score..

Gained hands-on experience in natural language processing (NLP), data analytics, and real-world problem solving within an educational context.

Enhanced teamwork and problem-solving skills while contributing to insights on how data science can transform educational tools and improve the learning experience.

PROJECTS

Tourist Recommendation System, August 2025 - February 2026

- Developed a web-based application to provide personalized travel recommendations. - Implemented recommendation logic based on user preferences such as location, interests, and budget. - Generated intelligent suggestions for tourist destinations, hotels, and local transport routes. - Designed the system to improve trip planning efficiency and user exper

Predictive Maintenance for Industrial Systems , January 2025 - June 2025

- Developed a machine learning-based predictive maintenance system to estimate the Remaining Useful Life (RUL) of turbofan engines using NASA's C-MAPSS dataset. Implemented algorithms like Random Forest Regressor for accurate RUL prediction, achieving low RMSE and high R^2 scores. Integrated the solution into a user-friendly Streamlit dashboard for real-time monitoring, anomaly detection, and maintenance planning. Enhanced reliability and reduced downtime by leveraging sensor data, data preprocessing, feature selection, and performance evaluation techniques.
